JavaScript Fundamentals

1. Given a web document as shown below in Fig. a, with only these few lines of code in shown in Fig. b. Using DOM Nodes to access, create, modify or remove any of its elements to have it finally as shown in Fig. c.

Fig. a

```
<div id="header">
        <img src ="hi.jpg" alt="hello" />
   </div>
   <div id="navigation">
        <ul id="nav">
                <li><strong>Memo</strong></li>
                <li><a href="Articles.html">Articles</a></li>
                <li><a href="Photos.html">Photos</a></li>
                <li><a href="About.html">About</a></li>
                <li><a href="Clients.html">Clients</a></li>
                <li><a href="Contact.html">Contact</a></li>
        </ul>
   </div>
```

2. Card Generator
Build a website to help your user to create his customized card as shown and open a new window with preview for his preferences.

Note:

The preview window and all of its elements will be created on the fly
